NMDS1

OldHigh
OldSlope
OldLow

This NMDS plot displays the relationship between three groups of samples: OldHigh, OldSlope, and OldLow. The x-axis represents the first dimension of variation (NMDS1), ranging from -1.0 to 1.0, and the y-axis represents the second dimension (NMDS2), ranging from -0.2 to 0.1. OldHigh samples, marked with black open circles, are clustered at the top center. OldSlope samples, marked with green crosses, are clustered on the left side. OldLow samples, marked with red open triangles, form a large cluster on the right side. Lines connect the centroids of these three clusters, forming a triangle that highlights their relative positions in the ordination space.
